

## Study Notes: Why I Believe

#2

*"God IS God!"*

Kevin King

Classical Arguments of Gods Existence:

1. Argument from \_\_\_\_\_ = for everything that exists, there must be a cause that brings it into being.
2. Argument from \_\_\_\_\_ = accounts for the complexity of the universe.
  - a. God has left His \_\_\_\_\_ on the universe.
3. The argument from \_\_\_\_\_ = mankind longs for God.

Why I believe atheism is wrong:

1. It is \_\_\_\_\_ and demands suppression of the truth everywhere evident about God.
2. It is an \_\_\_\_\_ that puts man at the center of the universe.
3. It produces \_\_\_\_\_.
4. It's a \_\_\_\_\_ that produces nothing positive.
5. It has \_\_\_\_\_ for the deepest questions of life.

The best argument for God's existence:

1. Is found in the \_\_\_\_\_.
  - a. If Jesus really did \_\_\_\_\_, then He really is the Son of God, and God really does exist.

Final thought:

- You still have to \_\_\_\_\_.

---

This week ask yourself...

1. Do I believe in God? Why or why not?
2. What percentage of knowledge of the universe do I possess?
3. Is it possible that God might exist outside my limited amount of knowledge?
